

Carpet Archiver

SQL-based design archiving & searching solution

Booria Carpet Archiver SQL-based design archiving and searching solution. With Booria Carpet Archiver, designs and all related product information can be archived in a SQL-based database in Server.

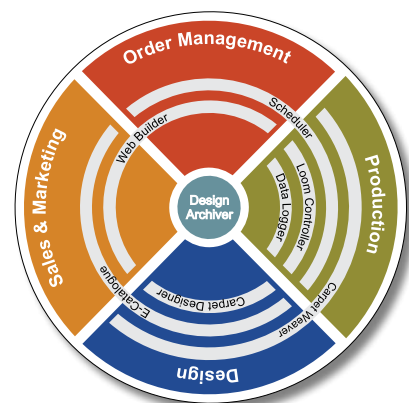

After organizing designs, all Booria applications such as Carpet Designer, Carpet E-Catalogue and ... can be linked to it and use the data for product designing and presentation based on different levels of permission.

Web Builder also can connect to this design database to update company's web site regularly with new products arrivals. E-Catalogues for interactive presentation of products can link to Archiver to update the marketing and sales team while ordering procedure can be handled smoother.

Features and Benefits ...

- :: Maintain and store designs and related product information in database.
- :: All information can be categorized easily.
