

Booria Carpet Designer

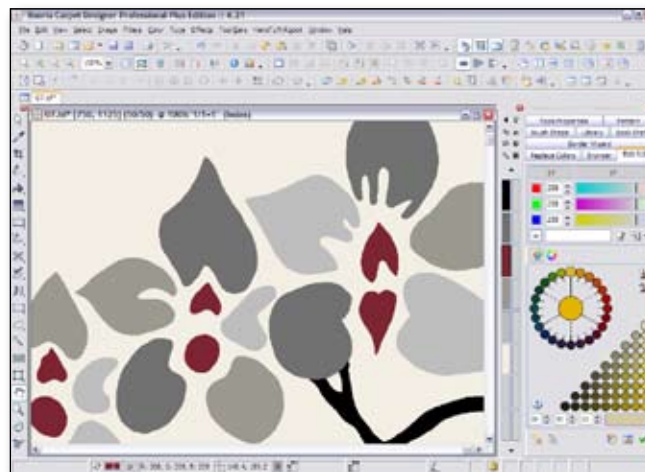

An ideal solution from the land of carpet

Booria Carpet Designer is a comprehensive solution which is able to meet all designing tasks in handmade, machine made and Robotic tufted rug production.

This advanced solution is coming with flexible set of drawing tools and complete range of designing functions and features, which are increasing the designing speed, accuracy and proficiency.

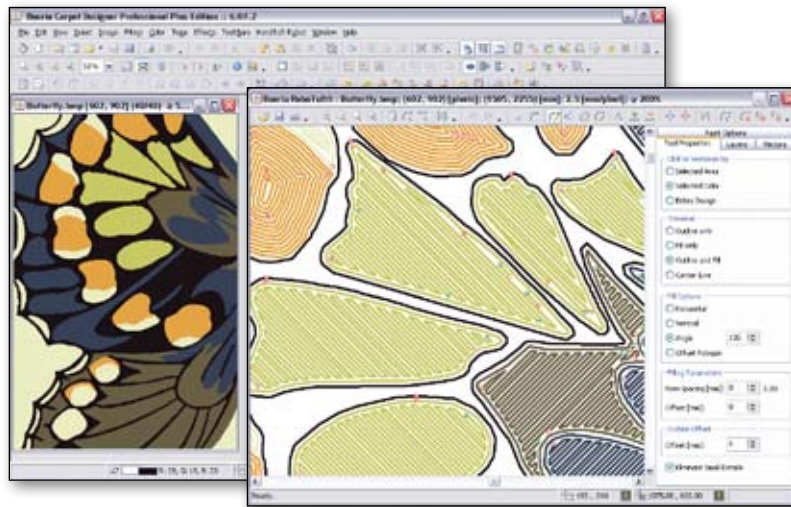

In **Booria Carpet Designer Robotuft Edition**, designers with handy and advanced tools and functions of pixel base designing, are capable to prepare designs for robotic tufted area rug production which is vector base. This ability leads to rapid, versatile and beautiful area rug design preparation which before was totally a problem for this type of area rug production. Rug designs can be freely prepared in pixel format and by utilizing advanced conversion function can be converted to vector base format to tuft on robot.

This fabulous software solution is completely compatible with Booria area rug tufting robot, Robotuft. This unique set of production hardware and software can bring many advantages for area rug producers which definitely the most important one is rapid response to market trends. Producers are just hours away from the final products because the responding time to market inquiries, from idea to production, can be reduced hours even minutes!

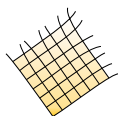

Features of Booria Carpet Designers

- :: Rapid retouching and carpet design preparation in different sizes
- :: Ability to work with scanned or digital images for carpet design preparation (Special Color Reduction Function)
- :: Coming with different coloring Standards specially Chromatone which developed for Carpet design preparation
- :: Utilizing with De-Perspective Function. To get the carpet design from a perspective image
- :: Equipped with complete set of drawing tools (up to 60 drawing tools), with special tools for spiral lines, symmetrical motifs, various types of curves and etc with customizable properties
- :: Special functions(more than 160) for carpet designing like; Resize, Rotate, Repeat, Mirror, Symmetry, Contour, Bookshelf and more
- :: Consisting of advanced designing filters like, Removing spots, Clearing design, Conditional replace and more

Special Features of Robotuft Edition

- :: View raster and vector layers of the same design at one place, with many viewing options
- :: Different Filling Algorithms: Zigzag filling in different angles, Offset polygon and Spiral filling
- :: Import and export to major raster & vector files; TIF, PCX, BMP, PLT, DWF, DXF and ...
- :: Vector manipulation tools such as Move, Join, Split, Reverse and ...
- :: Color coded vectors, respect to original design files
- :: Filtering Options for Optimized Production
- :: Export to machine coded file
- :: Production time calculation
- :: Preview Production Process
- :: Vector Editor tools
- :: Measure tool
